

# Cre8 Junior

Now I'm learning  
new things I'm  
having fun.

## Afternoon activities

Our Cre8 Junior program is for young people between the ages of seven and 18 years, who would like to try new things, learn practical skills and how to safely use tools while exploring your creative side and making friends.

Join our daily programs which run during school terms, Monday to Friday from 3pm to 5:30pm in our very own workshop. We can drop your child home after the program if you need that support.

You can access these programs from your NDIS Plan via your core or capacity building funds, to achieve goals such as social skills development, capacity building skills and independent skill development.

### Art Action

You'll learn how to use tools to create an artwork from recycled materials during this fun program. Design, up-cycle, research, draw, create a mood board and visit local community art projects for inspiration.

### Mechanic Skills

Want to learn how to work with motors and discover how they work? You can even bring in your bike and learn how to keep it in good condition and fixing a flat tire.

### Robot Mania

Discover electronics and build robots. You can even work with your friends to create amazing robots together.

### Timber Time

Woodworking projects to challenge you and prove your skills. Have a go and you might discover a life-long hobby.

**Do you have a project in mind that  
you have always wanted to make?  
Bring in your ideas and try them out.  
We would love to help you make it!**
